

Chief, Security Division

~~CONFIDENTIAL~~

26 August 1952

Executive Officer, I&SC

Complete Security Processing (2-14-6)

1. Attached is a recommendation from the [REDACTED] Report, subject as above captioned.

25X1A

2. The achievement of complete security processing of all applicants for employment has, of course, always been a goal of I&SC. Practical considerations have in the past and will continue for sometime in the future to preclude attainment of this complete process. However, this problem should be coordinated with the Personnel Office and plans should be made and projected into the future with this idea in mind, so that Provisional Clearances (referred to in another recommendation) will be used only in rare instances and Limited Clearances will become an infrequent exception to the regular full clearance procedure.

3. It is requested that the subject of investigative work loads and capabilities be coordinated with the Chief, SSD, and that you keep this office advised by memoranda of plans and progress toward reduction of Limited Clearances to the smallest possible number.
